

Section 16.21.28 Telecommunication.

(c) Definitions: The following words shall have the described meaning when used in this ordinance, unless a contrary meaning is apparent from the context of the word.

(i) **Antenna:** A transmitting or receiving device used in telecommunications that radiates or captures radio signals.

(ii) **Antenna Support Structures:** Any structure that can be used for the purpose of supporting an antenna.

(iii) **County:** Wasatch County, Utah.

(iv) **County-owned property:** Real property that is owned, leased or controlled by the County.

(v) **CMRS or Commercial Mobile Radio Service:** Low power wireless telecommunications service, including, but not limited to cellular, enhanced specialized mobile radio (ESMR), paging, personal communications systems (PCS) and point-to-point microwave.

(vi) **Co-location:** The location of an antenna on an existing structure, tower, or building that is already being used or considered for antenna facilities of another.

(vii) **Guyed Tower:** A tower that supports an antenna or antennas and requires guy wires or other stabilizers for support.

(viii) **Lattice Tower.** A self-supporting three or four sided, open steel frame structure used to support telecommunications equipment.

(ix) **Monopole:** A single, self-supporting, cylindrical pole, constructed without guy wires or ground anchors, that acts as the support structure for antennas.

(x) **Monopole Antenna with Platform:** a monopole with antennas and antenna support structure exceeding two feet (2') in width, but not exceeding fifteen feet (15') in width or eight feet (8') in height.

(xi) **Monopole antenna with no Platform:** A monopole with antennas and antenna support structure not exceeding two feet (2') in width or ten feet (10') in height.

(xii) **CMRS Antenna:** An antenna used in connection with the provision of CMRS telecommunications.

(xiii) **CMRS Facilities:** Facilities for the provision of transmitters, antennas, structures supporting antennas, and electronic equipment that is typically installed in close proximity to a transmitter.

(xiv) **Private Property:** Any real property not owned by the County, even if the property is owned by another public or governmental entity.

(xv) **Roof Mounted Antenna:** an antenna or series of individual antennas mounted on a roof, mechanical room or penthouse of a building.

(xvi) **Stealth Facilities:** CMRS Telecommunications facilities which have been designed to be compatible with the natural setting and surrounding structures, and which camouflage or conceal the presence of antennas and/or towers. This term includes, but it not limited to clock towers, church steeples, light poles, flag poles, signs, electrical transmission facilities and water tanks.

(xvii) **Tower:** A free-standing structure, such as a monopole tower, lattice tower, or guyed tower, that is used as a support structure for antenna.

(xviii) **Wall Mounted Antenna:** An antenna or series of individual antennas mounted on the vertical wall of a building or structure.

(xvx) **Whip Antenna:** an antenna that is cylindrical in shape. Whip antennas can be directional or omni directional and vary in size depending on the frequency and gain for which they are designed.
